

Pierre Glerant

AI & Software Engineer

Paris, Île-de-France | pierreglerant@gmail.com | +33 7 86 33 28 59 | [in](#) LinkedIn | [globe](#) Portfolio

Education

- CentraleSupélec**, Gif-sur-Yvette 2022 – 2025
Engineering degree, Master's level
Major: **Computer Science** | Specialization: **Artificial Intelligence**
- Computer Science: Advanced algorithms, programming, code maintainability
 - AI: MLOps, Machine Learning, Deep Learning, Reinforcement Learning, Computer Vision, Natural Language Processing
- Preparatory Classes PTSI-PT***, Lycée La Martinière Monplaisir 2020 – 2022
Scientific Baccalaureate, Lycée Descartes — Highest Honors 2018 – 2020

Experience

- Safran Data Systems**, Les Ulis October 2022 – September 2025
R&D Apprenticeship in Data Science, AI and Production Systems
- **Data Scientist — Launcher and Missile Telemetry Product Line (October 2022 – July 2024)**
 - Designed data processing pipelines for 3D modeling of satellite constellations and launcher trajectories (Python, NumPy, Pandas)
 - Contributed, within a cross-functional team, to the development of an antenna steering algorithm for NASA, improving the robustness of launcher trajectory tracking
 - **AI Application Engineer — Innovation Unit (August 2024 – September 2025)**
 - Developed and deployed a RAG chatbot and its internal application (RESTful FastAPI backend, React frontend), used by ~200 employees, generating an estimated ~€150k/year in productivity gains
 - Managed users, access rights and security features (PostgreSQL, authentication, roles)
 - Designed the RAG pipeline (indexing, retrieval, LLM) with Weaviate and deployed it using Docker
- ImmoSphere — Real Estate Analytics Platform** October 2025 – Present
◦ **Cofounder & Software Engineer**
- Built a full web application for data-driven real estate investment decision-making using multiple data sources
 - Designed the full-stack architecture: data pipelines, Python REST API, PostgreSQL database, React frontend, AWS deployment (EC2, RDS, Amplify) and production operations
 - Implemented interactive map-based visualizations to compare geographical areas across multiple criteria such as prices and rental yield

Projects

- SecureOps — Cybersecurity Application** October 2025 – Present
- Developed a web vulnerability scanner focused on the OWASP Top 10, with a web interface and analysis engine
 - Designed an asynchronous distributed architecture based on microservices, queues, workers and orchestration

Skills

- **AI & Data:** ML, MLOps, DL, LLM & RAG, Python (Pandas, NumPy, TensorFlow, PyTorch), SQL, data pipelines
- **Software Engineering:** RESTful APIs, PostgreSQL, JavaScript, React, Next.js, microservices architectures
- **DevOps & Cloud:** Docker, Git, CI/CD, AWS (EC2, RDS, Amplify), Linux, production deployment and monitoring
- **Soft skills:** cross-functional teamwork, autonomy, adaptability

Languages

French: Native English: B2 – C1
